To FCC I am a subscriber to xm radio, since this is a paid service I don't think the NAB should have any say in what programming xm radio broadcasts. I use their news and weather instant reports all the time since I drive over the road. The traffic reports for the city is especially helpful when entering the cities they report on to avoid traffic tieups and accidents in order not to create more of a traffic hazard and to promote safety by informing other drivers.

Sincerely Dave Smith
